

SURVIVOR SERIES DRONE HANGAR TRAILER

The Globe Power USA Drone Hangar is a fully integrated solution for remote drone operations featuring an auto-deploying drone platform with 120/240v power and communication ports, enabling fast and reliable remote deployment in the field. Powered by advanced solar technology combined with a 11.8kw LiFePO4 battery, the unit also offers a 360° camera to support continuous operation and site monitoring. Two separate insulated air-conditioned compartments protect equipment and provide a functional workspace, supported by a built-in workbench. Dual Starlink-powered communications and WiFi deliver dependable connectivity in remote locations, while the canopy lighting system allows safe operation day or night.

The Drone Hangar is suited to exploration mine sites, remote surveying, disaster response and power grid inspections. It can be customised with additional radio and telemetry equipment, first aid supplies and ancillary systems to match operational requirements.

Powered By:

Starlink enabled

PRODUCT SPECIFICATIONS

GENERAL

Model	Drone Hangar v1.0
Inverter	5kVA 120/240V Continuous @ 77°F
Generator	Hatz 3kVA 24V DC Tier 4 final Engine
Communications	Dual Starlink Remote Monitoring
Lumen Output	7800
Lights	5x 10w Floodlight
Inlet	1x L5-30 Inlet NEMA 4X
Outlets	2 x 15A GFCI twin receptacles 1 x 20A 120/240V feed to dock
Features	Remote Monitoring - cloud storage 2 x 600w Air Conditioners AC charger, Exterior Lighting Compartment Lighting, level alarm

OPERATIONAL DATA

Wind Rating	60mph
Working Temperature	32°F to 122°F

ELECTRICAL

Battery	11.8kWh Lithium Iron Phosphate
Solar	1.82kWp
Solar Tilt	5° to 30°

UNIT INFORMATION

Dimensions (Stowed)	172" x 88" x 110" (LxWxH)
Dimensions (Deployed)	266" x 171" x 203" (LxWxH)
Weight	6175lbs
